MULCHING EQUIPMENT SPECIALISTS

SEPPi M. Professional Flail Mulchers

Since 1971 SEPPi flail mowers have been working to satisfy professionals in agriculture and greenspace maintenance.

Strength and reliable performance, both in grass and wood, saves time and costs compared to less professional machines.

With a vast range of options and accessories, every machine can be equipped to meet specific professional needs, individual requirements or working conditions.

"Mulchers are a long-term investment.
It is important to us that you remain satisfied with your mulcher."

SEPPI M. SpA

Our Commitment

- > Founded in 1939, we have specialized in manufacturing mulchers since 1971
- > Regardless of the manufacturer or brand, we only choose materials and products that meet our rigorous quality criteria
- > Continuous research and development
- > High quality and optimal service

Your Advantages

- > Reliable equipment as the result of years of experience in the sector
- > High quality materials to take on the harshest work conditions and guarantee maximum durability
- > Advanced technology for an investment for the future
- > Consulting and after sales service: You can rely on us!

Rotors and Tools

Triple helical rotor
> better power distribution, low noise and vibration.
Holders made of forged and tempered steel,
high strength screws and heads
> ensures high wear resistance.

Rotor with powerful flails for mulching grass and brush,
made of forged steel >self-sharpening and wear-resistant.

Rotor with a large number of Y-blades
for mulching grass and brushwood.

Forestry rotor with swinging or fixed hammers with carbide inserts,
for mulching brush and wood.

Flail Mulchers 20-120 HP

Find the machine according to your application here.

The following mulchers are designed for tractors with a nominal power of 20-120 HP.

They mulch grass and prunings up to 7 cm in diameter.

Mulchers for 80-250 HP tractors and applications for material up to 11 cm in diameter are compiled in a separate brochure.

Versatility of SEPPi M. flail mulchers

Open rear hood:
to mulch grass with low power consumption

Closed rear hood:
for fine mulching prunings and brushes

Equipment for undercanopy maintenance (optional accessories)

In order to keep the orchards clean, SEPPI M. offers a spraying system as well as several mechanical attachments for organic farming. The accessories are connected to the mulcher with the quick coupling system X-FAST.

The several equipments and their use are listed below.

Attachments with quick coupling system

- > The **outrigger XSC** is specialized for inter-row mowing. The double XSC outrigger also adapts to row widths. This makes mowing much faster and more efficient.
- > The **cultivator XSA** supports organic agriculture. A mechanical process cuts the roots of weeds and brings them to the surface.
- > The brushes of the **shoot removers XSP and XDF** clean the trunk and remove shoot, suckers and straw mechanically – without chemicals.

Other accessories for undercanopy maintenance

- > The **sweeper XAN** collects leaves and prunings from row sides and bring them into an ideal position for mulching: in front of the mulching mower.
- > The **herbicide spraying system XID** can be mounted to a SEPPI mulcher or a rotary mower. High-precision nozzles come with adjustable spraying direction.

For details, refer to the brochure "Equipment for Undercanopy Maintenance".

SML

20-50 HP Ø max. 3 cm [1.2 inch]

Lightweight mulcher for light tractors

The SML flail mower is ideal for low nominal power tractors. Several options are available for the machine, guaranteeing a perfect result, whatever the conditions.

Standard version and characteristics

- > Mulches grass and brush up to 3 cm [1.2"]Ø

- > Working speed 3-10 km/h

- > 3 point rear linkage cat. 1&2 central fixed

- > 540 rpm gearbox with freewheel

- > Belt transmission

- > Front protection: metal flaps

- > Rear protection: rubber flap

- > Support roller 133 mm [52"] Ø

- > Standard rotor with SMW flails optionally with Y flails

Standard rotor with SMW flails

Optional rotor with Y flails

Height-adjustable support roller

Metal flaps in the front and rubber protection in the back protect tractor and driver

The power belt chassis is very compact - this allows the machine to work close to the crop

S5 cabrio

30-90 HP Ø max. 5/12 cm [2/5 inches]

Lightweight powerhouse - reliable for use as a high-grass mulcher

With a double skin casing made of wear resistant steel, the S5 cabrio is a perfect mulcher for exacting conditions. The lightweight construction allows work on sloping ground. With a manual inverter the mulching result can be optimized.

Depending on the direction of the rotor shaft it mulches low or high grass and brush.

Standard version and characteristics

- > Mulches grass and brush up to 5 cm [2"]Ø

- > Working speed 3-10 km/h

- > 3 point linkage cat. 1&2 front attachment or push

- > 540 rpm gearbox without freewheel with manual inverter

S5 cabrio · features

Robust double wall chassis made of high tensile and wear resistant steel AR400.

The STOPSAFE™ system for S5 cabrio avoids improper use of the machine. The system switches off the rotation if the rotor runs upwards and the hood is being opened. At the same time, if the hood is open it prevents the selection of the upward rotor direction.

Wide-open hydraulic front hood to mulch high grass

Linkage frame suitable for most current implement carriers and for tractors with reverse drive

Tempered counter knives for a perfect mulching result

Optional forestry rotor with swinging hammers

Optional forestry rotor with fixed hammers

Standard rotor with Y flails

Adjustable roller, Reinforced bearing and roller- Large diameter roller allows mulching on uneven ground

SMW0

30-90 HP Ø max. 5 cm [2 inch]

Mulcher with generous side shift

Agriculture or greenspace maintenance? All easy ...

– the mulchers of the SMW series mulch grass, prunings and bushes up to 5 cm [2"] in diameter.

The model SMW0 is distinguished by an extraordinarily wide side shift to the right. The parallel linkage system allows the machines to work under the trees and close to the crop leaving a much cleaner result.

Standard version and characteristics

- > Mulches grass and brush up to 5 cm [2"] Ø
- > Working speed 3-10 km/h
- > 3 point rear linkage cat. 1&2
- > Manual parallel linkage side shift
- > 540 rpm gearbox with freewheel and through shaft
- > Belt transmission
- > Adjustable rear hood with rubber protection
- > Front protection with metal flaps
- > Support roller 152 mm Ø
- > Standard rotor with SMW flails

Optional configuration and accessories

- > Rotor with Y flails
- > 1000 rpm gearbox
- > Reinforced transmission
- > Hydraulic side shift
- > Hood with rakes
- > Metal front wheels
- > Front protection with chains instead of metal flaps
- > Additional front rubber flap
- > Attachments for undercanopy maintenance (details see separate brochure)

SMO fh

50-120 HP Ø max. 7 cm [2.8 inch]

The expert among the lightweight mulchers with innovative linkage

Road sides, meadows, pastures – the SMO machines satisfy the needs of professionals in the most varied situations with an even clean cut.

The machines of this series mulch grass and brushwood up to 7 cm in diameter.

The **SMO fh** is characterized by an innovative, pyramid-shaped 3-point linkage, suitable for front and rear attachment. The top link connection provides high stability and is easily reversed to allow front or rear mount to be achieved without heavy lifting.

Standard version and characteristics

- > Mulches grass and brush up to 7 cm [2.8"]Ø
- > Working speed 3-10 km/h
- > 3 point linkage cat. 2 reversible
- > Linear hydraulic side shift
L150-175: 33 cm [13 inch] or
L200-275: 55 cm [21.6 inch]
- > 1000 rpm gearbox with freewheel and through shaft
- > Belt transmission
- > Adjustable rear hood with rubber protection
- > Front protection with metal flaps
- > Support roller 152 mm Ø
- > Standard rotor with SMO flails

Optional configuration and accessories

- > Rotor with Y flails
- > 540 rpm gearbox
- > Gearbox with automatic inverter and double freewheel
- > Metal front wheels
- > Front protection with chains instead of metal flaps
- > Rubber wheels instead of roller
- > Additional front rubber flap

SMO fh · features

Robust double wall chassis made of high tensile steel S420.

Innovative, pyramid-shaped 3-point linkage with high stability, suitable for front and rear attachment

Linear hydraulic side shift

model	each side	total
150-175	16.5 cm [6.5"]	33 cm [13"]
155-200	27.5 cm [10.8"]	55 cm [21.6"]

Gearbox for front- and rear attachment

Adjustable hood to set the degree of mulching

Adjustable support roller, Reinforced bearing and roller

Tempered counter knives for a perfect mulching result

Optional rotor with Y flails

Standard rotor with SMO flails
